

Daniella Korud
Way2Pay, Business Brave
Ireland

The internship I've participated was in Dublin, Ireland. Thanks to OA Prague and Erasmus+ program I worked for 2 companies at the same time.

Way2Pay powered by Three is an innovative fee collection system for schools, set up to decrease cost and increase convenience for busy, harried parents. The company has devised a simple, no-fuss system enabling parents to 'pay by text' for a school activity or event with their smartphone. Founded by Denise O'Grady, Way2Pay now has a team of eight and the service is available in a quarter of all Irish post-primary schools and nine ETB school clusters across Ireland. Way2Pay is Ireland's fastest growing cashless solution for schools and clubs. Increase cash flow in your organisation by calling Way2Pay today.

I have got a great experience at Database Creating and Internet communication. During the internship I was working as CEO assistant being responsible for all support work including editing, formatting, inputting, transmitting text, data, graphics, accounting, transcribing, completing expense reports etc. Since I was working there, I can clearly confirm that I have growth in time-managing, database creating skills, formal language(basic rules of format mailing and replying) and self development skills, I improved my leadership,

teamwork and administrative skills, learned new about psychological and alternative methods of approach, Entrepreneur skills and the marketing and accounting skills as well. What concerns my host family - no words needed. Everything was perfect. They were friendly, always kind and helpful to me. Pani Rita is fabulous woman and cooks delicious food...I never was hungry.

My leisure time I spent differently: walking through the ocean, learning local culture, walking the dog, Irish beer degustation;) I went everywhere on foot, rarely by bus or train - just in case of long destinations and work. The grand gave us money for transfer, food and paid for residence.

I am really satisfied with this internship, the host family and place as well, because I had an opportunity to feel country atmosphere and culture, which change my overview for a lot of things I assume were typical.
